

Section A -- Financial Statistics

The tables in this section generally present data on financial operations under the Railroad Retirement and Railroad Unemployment Insurance Acts for fiscal year 1996 and for varying numbers of prior years.

The main source of financing the railroad retirement program is a payroll tax paid by employers and employees. Railroad retirement taxes and benefits are paid on a two-tier basis. Employers and employees pay tier I taxes at the same rate as social security taxes, and the amount of earnings subject to the tax corresponds to the prevailing social security taxable maximum. Tier II taxes finance benefits payable over and above social security levels, but earnings subject to the tax are restricted to the social security taxable maximums which would have been applicable under continuation of pre-1977 social security law. Both employers and employees pay tier II taxes, but at different rates.

In calendar year 1995, a tier I tax rate of 7.65 percent for employers and employees applied to compensation up to \$61,200 per year. The tier II tax rate was paid by employers and employees at rates of 16.10 percent and 4.90 percent, respectively, and was levied on annual earnings up to \$45,300. During 1996, employers and employees also paid 7.65 percent for tier I taxes, while tier II tax rates remained at 16.10 percent and 4.90 percent for employers and employees, respectively. The earnings subject to these taxes in 1996 were limited to \$62,700 for tier I and \$46,500 for tier II. The tier I rates include taxes that finance the hospital insurance portion of Medicare; that tax rate for both employees and employers was 1.45 percent for 1995 and 1996. In the years 1991-93, hospital insurance had an annual earnings base separate from that for tier I. Beginning in 1994, there is no limit to earnings subject to the hospital insurance portion of the tier I tax rate.

Additional income is derived from Federal income taxes on tier I, tier II and vested dual benefits, from interest on invested funds and from the financial interchange with the social security system. The experience under the latter arrangement is presented in table A3. Under this arrangement, the social security trust funds are, in effect, credited with taxes received on railroad payrolls, and charged with the additional benefits and administrative costs they would have paid if railroad employment had been covered under the social security program. Financial interchange determinations are made jointly by the Board, the Social Security Administration, and the Health Care Financing Administration on an annual basis. Separate determinations are made with respect to the Old-Age and Survivors Insurance, Disability Insurance, and Hospital Insurance Trust Funds.

The railroad unemployment and sickness benefit programs are financed by contributions from railroad employers, based on a percentage of their employees' taxable earnings. In 1995 and 1996, the taxable earnings base for those programs was the first \$850 and \$865, respectively, of each employee's monthly earnings. Beginning in 1991, each employer's contribution rate is experience based.

Fiscal years begin October 1 of the prior calendar year and end September 30.

In the tables, detailed figures may not add to totals shown because of rounding.

¹ Benefit payments include a small amount of payments for hospital insurance benefits for services in Canada.

² Retirement benefits include vested dual benefit and supplemental annuity payments. Survivor benefits include vested dual benefit payments.

³ Benefit payments for fiscal year 1987 and later are not strictly comparable to those for prior years due to the change to a cash accounting system.

⁴ Reflects processing of large amounts of recoveries.

⁵ Includes extended unemployment benefits paid to claimants with less than 10 years of service and additional extended benefits to those with 10-14 years.

NOTE.-- Number of beneficiaries represents all individuals paid benefits in year. In total number for each year, beneficiaries are counted only once, even though they may have received more than one type of benefit. In fiscal year 1996, 19,300 individuals received both retirement and survivor benefits, 1,300 employees received both unemployment and sickness benefits, and 4,000 employees received benefits under both the Railroad Retirement Act and the Railroad Unemployment Insurance Act. These figures are partly estimated, and totals for earlier years are similarly adjusted.
